

**Project Title:** Data Cleaning of Chocolate Sales.

**Objective:** To enhance the quality and consistency of the dataset by addressing issues such as missing values, duplicates, and formatting inconsistencies.

**Key Steps Taken:**

- Identified and removed duplicate records.
- Handled missing values through imputation or removal.
- Standardized data formats (e.g., date formats, categorical values).
- Corrected inconsistencies in data entries.
- Validated the dataset for accuracy and completeness.

**Tools Used:** Microsoft Excel

**Outcome:** A cleaned and structured dataset ready for analysis and modeling.
